1 Introduction

This document is the *Disclosure Statement* concerning the issuance of qualified certificate for electronic seal service of e-Szignó Certification Authority operated by Microsec Micro Software Engineering & Consulting Private Company Limited by Shares (hereinafter: Microsec or *Certification Authority*).

The *Disclosure Statement* contains comprehensive information of the conditions for consumers using the service corresponding to the provisions of the *Certification Practice Statement*, according to the provisions of the decree 24/2016. (VI. 30.) of Ministry of Interiors concerning detailed requirements for trust services and their providers.

The *Disclosure Statement* complies with the requirements imposed by eIDAS regulation [1], the service provided in accordance with these regulations is a trust service according to the regulation.

The *Certification Authority* announced the trust service provision on the 1st of July 2016. to the National Media and Infocommunications Authority.

The conformity assessment audit of the trust services was carried out by the independent auditor TÜV Informationstechnik GmbH (hereinafter: TÜViT).

Based on the successful audit the National Media and Infocommunications Authority registered the qualified trust service and published it in the national Trust List on the 20th of December 2016.

1.1 Document Name and Identification

Issuer	e-Szignó Certification Authority
Document name	eIDAS conform Qualified Certificate for Electronic Seal Disclosure Statement
Document version	2.6
Date of effect	24/03/2018

The listing and identification information of the *Certificate Policies* that can be used according to the present *Disclosure Statement* can be found in section 1.1.1.

1.1.1 Certificate Policies

All *Certificates* issued by the *Certification Authority* refers to that *Certificate Policy* based on which they were issued.

The *Certification Authority* issues *Certificates* according to the following *Certificate Policies* based on the present *Disclosure Statement*:

OID	DENOMINATION	SHORT NAME
1.3.6.1.4.1.21528.2.1.1.181.2.6	Qualified, for electronic seal creation and validation, not for natural persons controlling <i>Certificates</i> issued on <i>Qualified electronic seal creation device</i> , Certificate Policy prohibiting the use of pseudonyms.	MBJBN
1.3.6.1.4.1.21528.2.1.1.182.2.6	Qualified, for electronic seal creation and validation, not for natural persons controlling <i>Certificates</i> issued on <i>Hardware Security Module</i> , Certificate Policy prohibiting the use of pseudonyms.	MBJHN
1.3.6.1.4.1.21528.2.1.1.183.2.6	Qualified, for electronic seal creation and validation, not for natural persons controlling <i>Certificates</i> issued by software, Certificate Policy prohibiting the use of pseudonyms.	MBJSN

The detailed requirements of the listed *Certificate Policy(s)* can be found in " e-Szignó Certification Authority – eIDAS conform Qualified Certificate for Electronic Seal Certificate Policies ver.2.6." [11]

Among the present *Certificate Policies*:

- each *Certificate Policy* complies with the [QCP-I] *Certificate Policy* defined in the ETSI EN 319 411-2 [9] standard;
- the [MBJBN] *Certificate Policy* complies with the [QCP-I-qscd] *Certificate Policy*.
- the [MBJHN] *Certificate Policy* complies with the [NCP+] *Certificate Policy* defined in the ETSI EN 319 411-1 [8] standard.

Compliance with the ETSI Certificate Policies

In cases when an ETSI Certificate Policy is based on another ETSI Certificate Policy and this way contains all the requirements of it, only the Identifier of the Higher Level Certificate Policy is referenced in the issued *Certificates*.

MBJSN	X		

1.2 Geographical Scope

The present *Disclosure Statement* includes specific requirements for services primarily provided for Hungarian *Clients*, operating by the Hungarian law in Hungary in Hungarian language. The *Certification Authority* can extend the geographical scope of the service, in this case, it shall use not less stringent requirements than those applicable to Hungarian conditions.

1.3 The Trust Service Provider

1.3.1 Data of the Provider

Name: MICROSEC Micro Software Engineering & Consulting
Private Limited Company by Shares

Company registry number: 01-10-047218 Company Registry Court of Budapest

Head office: 1031 Budapest, Záhony street 7. D. building

Telephone number: (+36-1) 505-4444

Fax number: (+36-1) 505-4445

Internet address: <https://www.microsec.hu>, <https://www.e-szigno.hu>

The access of the *Certificate Policy*, the *Certification Practice Statement* and the Privacy Policy:

- <https://e-szigno.hu/en/pki-services/certificate-policies-general-terms-and-conditions.html>

The access of the price list:

- <https://e-szigno.hu/hitelesites-szolgalatas/arlista/>

Refund:

The termination of the service agreement does not affect the fees paid by the *Subscriber*.

The *Certification Authority* does not issue refunds on fees that have already been paid, unless the service agreement expires due to the *Certification Authority's* fault, or if the *Certification Authority* explicitly allows for this – for example in case of several packages.

The certificates of the conformity assessment audit can be found on the official site of TÜViT on the following link:

<https://www.tuvit.de/en/certification-overview-1265-4512.htm>

and they are published also on the site of the *Certification Authority* on the following link:

<https://e-szigno.hu/eidas/eidas.html>

The identification of the issued certificate:

e-Szignó Qualified Seal Certificate ID: 9726.16

The access of the Hungarian national trust list:

- human readable PDF format: http://www.nmhh.hu/t1/pub/HU_TL.pdf
- machine-processable XML format: http://www.nmhh.hu/t1/pub/HU_TL.xml

The register of the National Media and Infocommunications Authority on trust services is available on the following link:

<http://webpub-ext.nmhh.hu/esign2016/>

The access of the service agreement:

The *Certification Authority* sends the service agreement to be concluded with the *Clientss* to the notification e-mail address of the *Subject* given during initial registration.

1.3.2 Contact information of the customer service

The name of the provider unit:	e-Szignó Certification Authority
Customer service:	1031 Budapest, Záhony street 7., Graphisoft Park, D building
Office hours of the customer service:	on workdays between 8:30-16:30 by prior arrangement
Telephone number of the customer service:	(+36-1) 505-4444
Email address of the customer service:	info@e-szigno.hu
Service related information access:	https://www.e-szigno.hu
Place for registering complaints:	Microsec zrt. 1031 Budapest, Záhony str. 7., Graphisoft Park, D building
Relevant Consumer Protection Inspectorate:	Budapest Capital Authority for Consumer Protection 1052 Budapest, Városház str. 7. 1364 Budapest, Pf. 144.
Relevant Arbitration Board:	Arbitration Board of Budapest 1016 Budapest, Krisztina krt. 99. III. em. 310. Mailing address: 1253 Budapest, Pf.: 10.

1.4 Certificate Types

The *Certificate Policies* supported by the *Certification Practice Statement* corresponding to the issuance of qualified certificate for electronic seal service are presented in section 1.2.1 of the *Certification Practice Statement*. The ID of the applied *Certificate Policy* is always indicated in the "Certificate Policies" field of the *Certificate*.

The e-Szignó Certification Authority provides various certificate types for its *Clients*, which mainly differ concerning their properties and data authentically bound to the *Subject*.

- *Organizational Certificate* means a *Certificate* wherein the *Subject* is an *Organization*, a device under the control of the *Organization* or the *Certificate* attests the relationship of a natural person *Subject* with the *Organization*. In this case, the name of the *Organization* is indicated in the "O" field of the *Certificate*. This type of a *Certificate* can only be used as specified by the *Organization*. In case of an *Organizational Certificate* issued to a natural person, further restrictions can be indicated in the "Title" field, related to the usage of the *Certificate*.

- *Certificate for Automatism* means a *Certificate* wherein the denomination of the IT device (application, system) is indicated amongst the *Subject* data in the *Certificate*, by the help of the *Subject* uses the *Certificate*.
- *Pseudonymous Certificate* means a *Certificate* wherein not the official denomination of the *Subject* is in the *Certificate*. In the pseudonymous *Certificates* the requested name is indicated in the "Pseudonym" field, and it is stated in the "CN" field that the *Certificate* contains a pseudonym.
- *Certificates* requiring *Qualified electronic seal creation device* usage: In that case the *Certificate* was issued to a public key for which the corresponding private key was generated on a *Qualified electronic seal creation device* – so it is guaranteed that the private key can not be extracted and copied –, then that information is indicated on the *Certificate* in the "QCStatements" field. Qualified electronic seal can be created only based on a *Certificate* this type.
- *Personal Certificate* means a *Certificate* that does not contain either an "O" or a "Title" field. This type can only be issued to natural persons.

The e-Szignó Certification Authority issues *Certificates* for natural persons and legal persons. In case of *Certificates* issued to legal persons the authorized representative natural person or a trustee authorized by the representative need to act on behalf of the legal person.

1.5 Certificate Usage

1.5.1 Appropriate Certificate Uses

The private keys belonging to the end-user *Certificates* issued by the *Certification Authority* based on the present service can be only used for electronic seal creation, with the *Certificates* the *electronic seal creator* can verify the authenticity of the documents sealed by him.

The public key in the *Certificate*, the *Certificate* itself, the *Certificate* revocation lists, the *Time Stamps* and the online revocation status responses can be used for the electronic seal.

1.5.2 Prohibited Certificate Uses

Certificates issued in accordance with the present *Certificate Policies*, and the private keys belonging to them using for other purposes than the generation and verification of electronic seal is prohibited.

1.6 Supervisory body

The *Certification Practice Statements* and the provision of the services are supervised by the National Media and Infocommunications Authority. The National Media and Infocommunications Authority maintains a register on the *Certificate Policies* and on the *Certification Authorities* applying these policies.

The register of the National Media and Infocommunications Authority on trust services is available on the below link:

<http://webpub-ext.nmhh.hu/esign2016/>

2 Identification and Authentication

2.1 Initial Identity Validation

The *Certification Authority* can use any communication channel within the limits provided by law, for the verification of the identity of the person or organization requesting the *Certificate*, and for checking the authenticity of the data provided.

The *Certification Authority* may refuse the issuance of the required *Certificate* at its sole discretion, without any apparent justification.

2.1.1 Method to Prove Possession of Private Key

Prior to the issuance of a *Certificate* the *Certification Authority* ensures and makes sure that the *Certificate* requester owns and has it under his control the private key belonging to the public key of the *Certificate*.

If the *Certification Authority* generates within its organization the private key belonging to the qualified *Certificate* of the *Subject* – typically on *Qualified electronic seal creation device* or on other, *Hardware Security Module* in case of *Certificate Policies* requiring such – , then it does not have to specially verify that the *Subject* owns the private pair of the public key to be verified. If the *Subject* requests the *Certificate* issuance for a key provided by it – typically in case of software certificates –, then the *Certification Authority* accepts the *Certificate Application* in PKCS#10 format, which at the same time confirms, that the owner of the private key asked for the *Certificate* indeed.

If the *Subject* private key is generated and managed by another *Trust Service Provider*, then the *Trust Service Provider* verifies that, the referred *Trust Service Provider* owns the private key, and is under the sole control of the *Subject*. The *Certification Authority* may accept the authentic statement of the referred *Trust Service Provider* about this. The format of the statement may be electronic. The *Certification Authority* verifies the authenticity of the statement.

The verification of the ownership might happen with the acceptance of a PKCS#10 formatted *Certificate Application* too.

2.1.2 Authentication of an Organization Identity

The identity of the *Organization* is verified in the following cases:

- if the *Subject* of the *Certificate* to be issued is the *Organization*;
- if the *Subject* of the *Certificate* to be issued is the device or system operated by the *Organization*;

Furthermore it is verified in these cases, that:

- whether the natural person acting on behalf of the *Organization* is entitled to act on behalf of the *Organization*;
- whether the *Organization* consented to the issuance of the *Certificate*.

For performing the verification, the *Client* shall give the following data:

- the official denomination and registered office of the *Organization*,
- official registration number of the *Organization* (e.g. company registration number, tax identification number), if applicable;
- the name of the organization unit within the *Organization*, if its indication in the *Certificate* is requested,
- If the *Client* requests the inclusion of the *Subject's* data regarding the Payment Services EU Directive (PSD2) [2] in the *Certificate*, then the *Client* shall give the approval number of the *Subject* issued by the authority supervising the payment services of the *Subject*, the type of the payment service and the name of the supervisory authority.

The following certificates and evidences have to be attached to the *Certificate Application*:

- the statement with the application submitter's manual signature on that the data given for the *Organization* identification is correct and comply with reality;
- a declaration of the the applicant with his signature that there is no trademark amongst the data to be indicated in the *Organization Certificate*, or if included, proof that the *Organization* is entitled to use the trademark;

- a certificate regarding that on behalf of the organization the *Certificate* application submitter natural person is entitled to submit the application ¹;
- the specimen signature of the person entitled to represent the *Organization* or other, official document equal to the specimen signature, which contains the name and signature of the persons entitled to represent the *Organization* ²;
- the *Organization* existence, name and the legal status verification document ³.

The *Certification Authority* is bound to verify the validity and authenticity of the presented documents.

The *Certification Authority* does not exclude the verification of *Organizations* registered abroad, as far as the data verification with adequate records of the country or obtaining a certificate issued by a trusted third party is feasible.

In respect of data verification, the *Certification Authority* accepts:

- certificate issued by the embassy or consulate of the foreign country in Hungary, that the organization exists and the given information is correct;
- certificate issued by a Hungarian embassy or consulate in a foreign country, that the organization exists and the given information is correct.

The *Certification Authority* can accept other documents and evidences too, if it makes sure that the level of security is the same as of the above. Obtaining such evidence and submitting it to the *Certification Authority* is the *Client's* responsibility.

The *Certification Authority* only accepts valid documents, and evidences not older than 3 months. The *Certification Authority* does not issue the *Certificate* if it considers that based on its internal rules it can not verify with corresponding confidence the certificate, document or the data of the foreign organization.

The *Certification Authority* guarantees by the proper usage of the trusted roles and the internal administrative processes that during the registration and verification process of the personal data at least two employees needed by the proper trusted roles.

2.1.3 Authentication of an Individual Identity

The natural person's identity shall be verified:

¹Section 2.1.5. contains the details regarding the verification of the authorizations and privileges.

²In case of Court of Registration registered firms the above documents can be acquired by the *Certification Authority*.

³In case of Court of Registration registered firms the above documents can be acquired by the *Certification Authority*.

- if a natural person is acting on behalf of an *Organization* for *Organizational Certificate* application.

When issuing a qualified *Certificate*, the identity of the natural person shall be verified according to (1) paragraph of Article 24 of the eIDAS regulation [1] by the physical presence or by a method providing equivalent security. The *Certification Authority* uses the identification methods described in the (1) paragraph of article 24. as follows.

The method of the identification of the natural person is:

1. During personal identification.

- the natural person shall appear in person at the *Registration Authority* to perform the personal identification;
- the identity of the natural person is verified during personal identification based on a suitable official proof of identity card;

The identification can be based on the following official documents:

- in case of natural persons within the scope of Act LXVI. of 1992. (henceforth: Nytv. [3]) official cards appropriate for verifying identity defined in Nytv. in accordance with Eüt. 85.§ (3) [5];
 - in case of natural persons outside the scope of Nytv. [3] on the basis of a travel document defined in the Act on the entry and residence of persons enjoying the right of free movement and residence or the law on entry and residence of third-country nationals [4] in accordance with Eüt. 85.§ (4) [5];
 - in case of identifying natural persons abroad none on the basis of the above documents the *Certification Authority* applies identity verification in accordance with Eüt. 82. (5) [5] only in the case of identifying European citizens. In such case, accepts a personal identity card with a photo issued by the European country of nationality accepted as a trusted document for identity verification.
- the natural person shall verify the accuracy of the data for the registration and identity verification with a statement signed with a handwritten signature;
 - the *Certification Authority* verifies, whether any alteration or counterfeiting happened to the presented identity cards.

During the initial identity verification the *Certification Authority* may accept the identification of a natural person carried out by a state notary as equivalent to the identity validation made by its own *Registration Authority*, if it can be stated on the basis of the notarial certification clause attached to the *Certificate Application* signed before the notary that the state notary had compared the personal data of the *Applicant* having appeared before the notary with the content of an authentic public registry or other central database.

When the *Certification Authority* verifies the identity of foreign citizens it performs data reconciliation with the proper records of the country which issued the personal identity card with a photo used for the identification of the natural person, if such records are available. Additional steps are necessary for verifying the foreign document with appropriate confidence, as well as to access the foreign register. In respect of data verification, the *Certification Authority* accepts:

- certificate issued by the embassy or consulate of the foreign country in Hungary, which states that the given personal ID card exists and valid and the natural person or organization exists and the given information is correct;
- a *Certificate Application* signed before a public notary registered in such foreign country, which concluded an international bilateral treaty with Hungary on the mutual recognition of public deeds, provided that the notarial certification clause shows that the notary had verified the identity of the natural person *Applicant*;
- certificate equipped with an Apostille issued by the authorized organization or authority of the foreign country, which states that the given personal ID card is existing and valid and the natural person or organization exists and the given information is correct.

The *Certification Authority* accepts original documents issued only in Hungarian and English language. Documents issued in another language shall be submitted with a Hungarian or English official translation translated by a notary with a linguistic license or the OFFI (Hungarian Office for Translation and Attestation).

The *Certification Authority* can also accept other documents and evidences, if it makes sure that the level of security is the same as of the above. Obtaining such evidence and submitting it to the *Certification Authority* is the *Client's* responsibility.

The *Certification Authority* only accepts valid documents and evidences not older than 3 months.

The *Certification Authority* does not issue the *Certificate* if it considers that based on its internal rules, that it can not verify with corresponding confidence the certificate, document or the data of the foreign organization.

2. Remotely using an electronic identification device, with respect to that the physical presence of a natural person or a representative entitled to represent the legal person before issuing qualified certificates has been guaranteed, and which complies with the substantial or high security levels defined in Article 8 of eIDAS regulation [1].

The *Certification Authority* will introduce this identity verification solution after starting the central identification service in Hungary and getting the process approved by the auditor.

In these cases:

- In addition, during identification besides subject's name an identification number or other data accepted on a national level that enables that natural persons can be distinguishable from others of the same name shall be supplied.
3. By identification traced back to an electronic signature certificate. In this case:
- The *Subject* submits the *Certificate Application* in electronic format with an electronic signature based on a non-pseudonymous *Certificate* with a security classification not lower than the requested *Certificate* .
 - The electronically signed *Certificate Application* shall contain the data needed for the definit identification of the natural person.
 - The authenticity and confidentiality of the *Certificate Application* shall be verified on the whole certification chain.
 - The *Certification Authority* may accept only those electronic signatures, which are based on a *Certificate* issued by a Trust Service Provider which is listed on the Trusted List of one of the EU member states and was valid at the time of the signature creation.
4. By using other identification methods recognised at national level which provide equivalent assurance in terms of reliability to physical presence. The equivalent assurance shall be confirmed by a conformity assessment body.

The *Certification Authority* will introduce this remote identity verification solution after getting the process approved by the auditor.

In this case the *Certification Authority* processes the identity verification the same way as in case of the personal identification. The only difference is that the face to face identification is replaced by a remote validation process which ensures that

- the identity of the natural person can be securely verified;
- the identity of the natural person and the official proof of identity card used for the verification can be connected with high reliability by using biometrical identification data;
- the natural person can be connected to the received *Certificate Application*.

The *Certification Authority* uses the data reconciled during a previous identification procedure, if the *Subject* requests new *Certificate* instead of an expired or a revoked one, or if he requests a new *Certificate* besides the existing one during the validity period of the service agreement. The authenticity of the *Certificate* application, the accuracy of the data to be in the *Certificate* and the identity of the person submitting the application shall also be checked.

The *Certification Authority* guarantees by the proper usage of the trusted roles and the internal administrative processes that during the registration and verification process of the personal data at least two employees needed by the proper trusted roles.

2.1.4 Non-Verified Subscriber Information

Only that data can be in the *Certificate* issued by the *Certification Authority*, which was verified by the *Certification Authority* or on the authenticity of which the *Subject* made a statement with recognition of their criminal liability.

2.1.5 Validation of Authority

The identity of the natural person representing the legal person is verified according to the requirements of Section 2.1.3. before issuing an *Organizational Certificate*.

The right of representation of the natural person shall be verified.

Persons entitled to act on behalf of an *Organization*:

- a person authorized to represent the given *Organization*,
- a person who is mandated for that purpose by an authorized person to represent the *Organization*,
- an *Organization* administrator appointed by an authorized person to represent the *Organization*,

An organization administrator is a person who is eligible to act during the application, suspension, reinstatement and revocation of the *Certificates* issued to the *Organization* .

The organization administrator can be appointed during *Certificate* application, or anytime later with the help of the corresponding form. The identifier information of the designated person(s) shall be given on the form, by which he/she can be identified in later litigation. The form shall be (manually or qualified electronically) signed by the representative of the *Organization*, which is verified by the registration associate of the *Certification Authority* when received. Appointing an organization administrator is not mandatory, and multiple organization administrators can be appointed too. If there is no appointed organization administrator, then the person entitled to represent the *Organization* can perform this task.

2.1.6 Criteria for Interoperation

The *Certification Authority* does not work together with other Certification Authorities during the provision of the service.

2.2 Privacy policy

The *Certification Authority* treats *Clients'* data according to legal regulations. The related Privacy policy is accessible from the webpage of the *Certification Authority* (<https://e-szigno.hu/>

letöltések/dokumentumok-es-szabalyzatok/), and for more information see section 9.3 of the *Certification Practice Statement*.

3 The Requirements for Certificates

3.1 Key Pair and Certificate Usage

3.1.1 Subscriber Private Key and Certificate Usage

The *Subject* shall only use its private key corresponding to the *Certificate* for electronic seal creation, and any other usage is prohibited.

A private key corresponding to an expired, revoked, or suspended *Certificate* shall not be used for electronic seal creation.

The *Subject* is bound to ensure the adequate protection of the private key and the activation data.

The limitations determined in Section 1.5. have to be followed during the usage.

3.1.2 Relying Party Public Key and Certificate Usage

To retain the level of security guaranteed by the *Certification Authority*, in the course of accepting the electronic seal verified, the *Relying Party* is recommended to proceed prudentially particularly regarding to the following:

- the *Relying Party* shall verify the validity and revocation status of the *Certificate*;
- *Certificates* for electronic seals and the corresponding public keys shall only be used for electronic seal validation;
- the verifications related to the *Certificate* should be carried out for the entire certificate chain;
- the electronic seal verification shall be performed with a reliable application, which complies with the related technical specifications, can be resiliently configured, and has been set correctly, and it runs within a virus-free environment;
- it is recommended to verify that the *Certificate* was issued according to the appropriate Certificate Policy;
- when accepting a qualified electronic seal it is recommended to verify that the *Certificate* was issued based on a *Certificate Policy* requiring *Qualified electronic seal creation device*;

- it is recommended to verify the highest value of the obligation undertaken at one time indicated in the *Certificate* (the Certification Authority is not responsible for the claims arising from electronic documents issued and sealed concerning transactions in excess of those limits and for the damage caused this way.);
- the *Relying Party* shall consider any restrictions indicated in the *Certificate* or in the regulations referenced in the *Certificate*.

The *Certification Authority* makes available a service for its *Clients* and *Relying Parties* that they can use to verify the issued *Certificates*.

3.2 Certificate Revocation and Suspension

The process when the *Certification Authority* terminates the validity of the *Certificate* before expiration is called *Certificate* revocation. The *Certificate* revocation is a permanent and irreversible status change; the revoked certificate will never be valid again.

The process when the *Certification Authority* temporarily ceases the validity of the *Certificate* before expiration is called *Certificate* suspension. The *Certificate* suspension is a temporary state; the suspended *Certificate* can be revoked, or before the end of the validity, with the withdrawal of the suspension it can be made valid again. In case of the withdrawal of suspension the *Certificate* becomes valid retroactively, as if it has not been suspended.

The usage of the private key belonging to the revoked or suspended *Certificate* shall be eliminated or suspended immediately.

If possible, the private key belonging to the revoked *Certificate* shall be destroyed immediately after revocation.

Responsibility regulations related to revocation and suspension:

- Before the revocation/suspension request is received by the *Certification Authority*, the *Subject* and the *Subscriber* are responsible for the damages arising.
- After the *Certification Authority* accepts the revocation or suspension request, the *Certification Authority* is responsible for the damages arising. The *Certification Authority* forthwith publishes the changed revocation state of the *Certificate* after accepting the request.
- If the *Certification Authority* has already published the invalid revocation state of the *Certificate*, the *Certification Authority* does not take any responsibility, if the *Relying Party* considers the *Certificate* valid.

3.2.1 Who Can Request Revocation

The revocation of the *Certificate* may be initiated by:

- the *Subscriber*;
- the contact person specified in the service agreement;
- the supervisory authority which issued the payment service licence for the *Subject*, if the *Certificate* contains the *Subject*'s data regarding the Payment Services EU Directive (PSD2) [2];
- the *Certification Authority*.

3.2.2 Procedure for Revocation Request

The *Certification Authority* ensures the following possibilities to submit a revocation request:

- on paper signed manually at the customer service of the *Certification Authority* during office hours in person;
- in an electronic form with an electronic signature based on the non-pseudonymous *Certificate* with a security classification not lower than the *Certificate* to be revoked (see section ??.);
- in an electronic form with an electronic seal created by the *Certificate* of the *Subscriber* with a security classification not lower than the *Certificate* to be revoked (see section ??.);
- signed manually, sent by post to the customer service.

The *Certification Authority* verifies the authenticity of the request, and the submitter's eligibility during the evaluation of the request.

In case of *Certificate* application signed with a valid qualified electronic signature, there is no need for further verification of the identity of the applicant and the authenticity of the application.

In case of submitting revocation application on paper, via mail the *Certification Authority* verifies the manual signature on the application.

The reason for revocation shall be stated. If the revocation was requested by the *Client*, and it does not state the reason for revocation, then the *Certification Authority* considers that the reason for revocation is that the *Subject* does not want to use the *Certificate* anymore.

If the *Client* asks for revocation due to key compromise, the *Certification Authority* ensures a possibility during the revocation process, to request a new *Certificate* in the framework of *Re-key* to replace the *Certificate* to be revoked.

The revocation request contains the data to identify the *Certificate*.

The requester has to provide particularly the following information:

- the exact denomination of the *Subject*;
- the *Certificate's* unique identifier;
- if the *Certificate* was issued on a *Qualified electronic seal creation device*, the unique identifier of the *Qualified electronic seal creation device*;
- identification data of the *Client*.

In case of a successful revocation the *Certification Authority* notifies the *Subject* and the *Subscriber* about the fact by email.

3.2.3 End-User Certificates

The validity period of the end-user *Certificates* issued by the *Certification Authority*:

- at most 2 years from issuance;
- shall not exceed the amount of time to which the used cryptographic algorithms are safely usable according to the algorithmic decree of the National Media and Infocommunications Authority;
- shall not exceed the validity period of the *Certificate* issuer provider *Certificate* validity period.

Within the framework of certificate renewal a new *Certificate* may be issued for the end-user key. The validity period of the *Certificates* and private keys may be affected by a new algorithmic decree issuance by the National Media and Infocommunications Authority, according to which the used cryptographic algorithm or key parameter is not safe until the end of the usage period planned at the time of the issuance.

When this occurs the *Certification Authority* revokes the affected *Certificates*.

4 Compliance Audit and Other Assessments

The operation of the *Certification Authority* is supervised by the National Media and Infocommunications Authority in line with European Union regulations. The National Media and Infocommunications Authority holds site inspections on at least yearly basis at the *Certification Authority* location. Before the site inspection, the *Certification Authority* has a screening of its operations by an external auditor and sends the detailed report of the screening to the National Media and Infocommunications Authority within 3 days from its receipt. During the screening it

is to be determined whether the operation of the *Certification Authority* meets the requirements of the eIDAS Regulation [1] and the related Hungarian legislation and the requirements of the applied *Certificate Policy(s)* and the corresponding *Certification Practice Statement(s)*.

The subject and methodology of the screening complies with the following normative documents:

- REGULATION (EU) No 910/2014 OF THE EUROPEAN PARLIAMENT AND OF THE COUNCIL of 23 July 2014 on electronic identification and trust services for electronic transactions in the internal market and repealing Directive 1999/93/EC [1];
- ETSI EN 319 403 V2.2.2 (2015-08) Electronic Signatures and Infrastructures (ESI); Trust Service Provider Conformity Assessment - Requirements for conformity assessment bodies assessing Trust Service Providers; [7]
- ETSI EN 319 401 V2.1.1 (2016-02); Electronic Signatures and Infrastructures (ESI); General Policy Requirements for Trust Service Providers [6]
- ETSI EN 319 411-1 V1.1.1 (2016-02); Electronic Signatures and Infrastructures (ESI); Policy and security requirements for Trust Service Providers issuing certificates; Part 1: General requirements [8]
- ETSI EN 319 411-2 v2.1.1 (2016-02); Electronic Signatures and Infrastructures (ESI); Policy and security requirements for Trust Service Providers issuing certificates; Part 2: Requirements for trust service providers issuing EU qualified certificates; [9]

The result of the screening is a confidential document accessible only to authorized persons.

The conformity certificate issued in accordance with the conformity assessment report is published on the webpage of the *Certification Authority*.

The *Certification Authority* applies verified and certified elements (electronic signature production IT system elements) in connection with the service.

The *Certification Authority* uses the following cryptographic modules for the certification of the *Certificates*, and for the provider private key storage:

- nCipher nShield F3 PCI nC4032P-150, firmware verzió: 2.18.15-3;
- nCipher nShield F3 PCI nC4032P-150, firmware verzió: 2.22.6-3;
- nCipher nShield F3 PCI nC4033P-500, firmware verzió: 2.33.60-3;
- nCipher nShield F3 PCI nC4033P-500, firmware verzió: 2.38.7-3;
- nCipher nShield F3 PCIe nC4433E-500, firmware verzió: 2.61.2-3.

The above devices have FIPS 140-2 [10] Level 3 certification.

The *Certification Authority* provides the following *Qualified electronic seal creation devices* for the *Subjects*:

- Smartcard which consist of ST19WR66I microchip and Touch & Sign2048 V1.00 signature creation application.
(Supplier: ST Incard)
- MultiApp ID Citizen 72k smartcard which consist of S3CC91C microchip, MultiApp v1.1 Java Card platform and IAS Classic v.3.0 electronic signature application.
(Supplier: Gemalto)
- IDClassic 340 smartcard which consist of P5CC081V1A microchip, MultiApp ID v2.1 Java Card platform and IAS Classic v.3 electronic signature application (version: MPH117 V2.2 filter).
(Supplier: Gemalto)
- ARX CoSign v7.1 Secure Signature Creation Device (version: v7.1).
(Supplier: DocuSign (ARX))
- IDPrime MD 840 (contact mode only) and IDPrime MD 3840 (contact and non-contact mode) smartcard which consist of M7820 A11 security controller, MultiApp v3 Java Card platform and IAS v.4 electronic signature application.
(Supplier: Gemalto)

The actual list of the *Qualified electronic seal creation devices* used by the *Certification Authority* and the information related to its certification can be found on the web page of the *Certification Authority* on the following link:

<https://e-szigno.hu/letoltesek/dokumentumok-es-szabalyzatok/kripto-eszkozok-tanusitottsaga.html>

The informativ full list of the certified *Qualified electronic seal creation devices* can be found on the web page of the European Commission on the following link:

<https://ec.europa.eu/futurium/en/content/compilation-member-states-notification-sscds-and-qscds>

The *Certification Authority* has rated every one of the system elements used for providing the services into security classes on the basis of its risk assessment system. The *Certification Authority*

keeps records about these system elements and the security ratings associated with them in the scope of its risk management system.

In addition to the external audit, the *Certification Authority* also has its proprietary internal auditing system, which regularly examines compliance with previous audits, and takes the necessary steps in case of deviations.

The *Certification Authority* has an ISO 9001 standard compliant quality management system since 2002, moreover an ISO 27001 (formerly BS 7799) compliant information security management system since 2003, which are continuously audited and reviewed by an external auditing organisation.

For more information on the governing law and compliance audits see section 5.4 of this document and sections 8. and 9.15 of the *Certification Practice Statement*.

5 Other Business and Legal Matters

5.1 Representations and Warranties

5.1.1 Subscriber Representations and Warranties

Subscriber Responsibility

The responsibility of the *Subscriber* is set by the service agreement and its attachments (including the terms and conditions).

Subscriber Obligations

The responsibility of the *Subscriber* is to act in accordance with the contractual terms and regulations of the *Certification Authority* while using the service including requesting and applying the *Certificates* and private keys.

The obligations of the *Subscriber* are determined by this *Certification Practice Statement*, the service agreement and the standard policy conditions and other documents forming an integral part with it, as well as the relevant *Certificate Policys*.

Subscriber Rights

- *Subscribers* have the right to use the services in accordance with this *Certification Practice Statement*.

- *Subscribers* are entitled to specify which *Subjects* should be allowed to receive certificates, in writing, and *Subscribers* have the right to request the suspension and suspension and revocation of such certificates.
- *Subscribers* have the right to request the suspension and revocation of certificates.
- *Subscribers* are entitled to appoint an organisational administrator.

Subject Responsibility

The *Subject* is responsible for:

- the authentication, accuracy and validity of the data provided during registration;
- the verification of the data indicated in the *Certificate*;
- to provide immediate information on the changes of its data;
- using its *Electronic seal creation device*, private key and *Certificate* according the regulations;
- the secure management of its private key and activation code;
- for the immediate notification and for full information of the *Certification Authority* in cases of dispute;
- to generally comply with its obligations.

Subject obligations

The *Subject* shall:

- read carefully this *Certification Practice Statement* before using the service;
- completely provide the data required by the *Certification Authority* necessary for using the service, and to provide truthful data;
- if the *Subject* becomes aware of the fact that the necessary data supplied for using the service – especially data indicated in the certificate – have changed, it is obliged to immediately:
 - notify the *Certification Authority* in writing,
 - request the suspension or suspension or revocation of the *Certificate* and
 - terminate the usage of the *Certificate*;

- use the service solely for the purposes allowed or not proscribed by legal regulations, according to the cited regulations and documents;
- ensure that no unauthorized individuals have access to data and tools (passwords, secret codes, signature-creation devices) necessary for using the service;
- notify the *Certification Authority* in writing and without delay in case a legal dispute starts in connection with
any of the electronic seal or the *Certificates* associated with the service;
- cooperate with the *Certification Authority* in order to validate the data necessary for issuing certificates, and to do everything they can to allow the soonest possible completion of such verification;
- the *Subject* shall answer to the requests of the *Certification Authority* within the period of time determined by the *Certification Authority* in case of key compromise or the suspicion of illegal use arises;
- acknowledge that the *Subscribers* entitled to request the revocation and/or suspension and/or suspension of the *Certificate*;
- acknowledge that the *Certification Authority* issues *Certificates* in the manner specified in the *Certification Practice Statement*, upon the completion of the validation steps described therein;
- acknowledge that the *Certification Authority* only displays data that are corresponding to reality in issued *Certificates*. Accordingly, the *Certification Authority* validates data to be entered in *Certificates* according to the *Certification Practice Statement*;
- acknowledge that the *Certification Authority* revokes the issued *Certificate* in case it becomes aware that the data indicated in the *Certificate* do not correspond to the reality or the private key is not in the sole possession or usage of the *Subject* and in this case, the *Subject* is bound to terminate the usage of the *Certificate*;
- acknowledge that the *Certification Authority* has the right to suspend and revoke *Certificates* if the *Subscriber* fails to pay the fees of the services by the deadline;
- acknowledge that the *Certification Authority* has the right to suspend and revoke *Certificate* if the *Subscriber* violates the service agreement or the *Certification Authority* becomes aware that the *Certificate* was used for an illegal activity.

Subject Rights

- *Subjects* have the right to apply for *Certificates* in accordance with the *Certification Practice Statement*.
- In case this is allowed by the applicable *Certificate Policy*, *Subjects* are entitled to request the suspension and suspension and the revocation of their *Certificates*, according to this *Certification Practice Statement*.

5.1.2 Relying Party Representations and Warranties

The *Relying Parties* decide based on their discretion and/or their policies about the way of accepting and using the *Certificate* . During the verification of the validity for keeping the security level guaranteed by the *Certification Authority* it is necessary for the *Relying Party* to act with caution, so it is particularly recommended to:

- comply with the requirements, regulations defined in the present *Certificate Policy* and the corresponding *Certification Practice Statement*;
- use reliable IT environment and applications;
- verify the the *Certificate* revocation status based on the current CRL or OCSP response;
- take into consideration every restriction in relation to the *Certificate* usage which is included in the *Certificate*, in the *Certificate Policy* and the *Certification Practice Statement*.

5.2 Limitations of Liability

- The *Certification Authority* is not responsible for damages that arise from the *Relying Party* failing to proceed as recommended according to effective legal regulations and the *Certification Authority*'s regulations in the course of validating and using certificates, moreover its failing to proceed as may be expected in the situation.
- The *Certification Authority* shall only be liable for contractual and non-contractual damages connected to its services in relation to third parties with respect to provable damages that occur solely on account of the chargeable violation of its obligations.
- The *Certification Authority* is not liable for damages that result from its inability to tend to its information provision and other communication related obligations due to the operational malfunction of the Internet or one of its components because of some kind of external incident beyond its control.

- If The *Certification Authority* engages data comparison with an authentic database before the issuance of the *Subject's Certificate*, it relies on the data received from the authentic database. The *Certification Authority* will not assume any liability for damages arising out of the inaccuracy of information provided by such authentic databases.
- The *Certification Authority* assumes liability solely for providing the services in accordance with the provisions of this *Certification Practice Statement*, as well as the documents to which reference is cited herein (Certification Policies, standards, recommendations), moreover with its proprietary internal regulations.

Administrative Processes

The *Certification Authority* logs its activities, protects the intactness and authenticity of log entries, moreover retains (archives) log data over the long term in the interest of allowing for the establishing, documenting, and evidencing of financial accountability, its proprietary liability related to damage it causes, as well as that of damage compensation due to it for damage it suffers.

The *Certification Authority* preserves the archived data for the time periods below:

- *Certification Practice Statement*: 10 years after the repeal;
- All electronic and / or paper-based information relating to Certificates for at least:
 - 10 years after the validity expiration of the Certificate;
 - until the completion of the dispute concerning the electronic seal generated with the certificate;

Financial Liability

The *Certification Authority* has appropriate deposit according to the relevant legal requirements for its financial liability and to guarantee costs related to its termination and for reliability.

The *Certification Authority* has liability insurance according to the legal regulations required in order to ensure reliability.

Limitation of Financial Liability

The *Certification Authority* does not limit the highest level of the obligation undertaken at the same time.

In connection with the services provided as a qualified provider, the *Certification Authority* defines tariff plans, which differ from each other in the financial liability of the *Certification Authority* as stated below.

Certificate type	Limitation of the provider liability [M HUF]
basic	0,02
bronze	0,1
silver	5
gold	20
platinum	50

If the valid claim of several entitled parties related to an insurance event exceeds the amount defined for an insurance event in the liability insurance for the damages, then the compensation of the claims takes place in a relative ratio to the amount determined in the liability contract.

5.3 Dispute Resolution Provisions

The *Certification Authority* aims for the peaceful and negotiated settlement of the disputes arising from its operation. The settlement follows the principle of gradual approach.

The *Certification Authority* and the *Client* mutually agree that in the case of any disputed issue or complaint arising whatsoever, they will attempt amicable consultation through negotiation before taking the dispute to legal channels. The initiating party will be obliged to notify every other affected party promptly and to inform them fully concerning all of the case's implications.

The *Client* in case of a deputation is entitled to appeal to the Arbitration Board of Budapest before incidental judicial proceedings.

Questions, objections, and complaints related to the activity of the *Certification Authority* or the use of issued *Certificates* shall be addressed to the customer care centre office in written form. The *Certification Authority* notifies submitting parties at the address they specify about having received a submission and the time required for investigation, within 3 business days calculated as of receiving a submission. The *Certification Authority* is obliged to issue a written response to the submitter within the specified time limit. The *Certification Authority* may request the provision of information required for giving a response from the submitter. The *Certification Authority* investigates complaints within 30 days, and notifies submitters about the results thereof.

Should a submitter find the response inadequate or if the dispute which had arisen can not be settled based on it without getting the *Certification Authority* involved, the submitter may initiate consultation with the *Certification Authority* and the *Relying Parties*. All participants of such consultation shall be given written notice regarding the date of consultation 10 business days in advance thereof; and the submission, the *Certification Authority's* response, as well as any documents containing other required information shall be sent to them in writing.

Should consultation fail to achieve a result within 30 business days calculated as of a complaint being submitted, the submitter may file a lawsuit with respect to the issue. The *Relying Parties* shall subject themselves to the sole jurisdiction of the II. and III. District Court of Budapest and/or that of the Municipal Court of Budapest.

5.4 Governing Law

The *Certification Authority* at all times operates in accordance with the Hungarian legislation in force. The Hungarian law is the proper law of the *Certification Authority* contracts, regulations, and their execution, and they are to be construed by the Hungarian law.
